JORDI SALAZAR

Senior Backend Engineer (Go) | Distributed Systems | Event-Driven Architecture

Manresa (Barcelona), Spain | +34 628 931 419 | jordisalazarbadia@gmail.com | LinkedIn | GitHub

SUMMARY

Senior Backend Engineer with 3+ years building production Go services and distributed systems. Deep expertise in event-driven architectures (CQRS, Event Sourcing), microservices, and cloud-native deployments (GCP/AWS). Strong focus on clean architecture (DDD, Hexagonal), high test coverage, and production-grade observability. Currently leading backend teams and owning technical roadmaps.

CORE SKILLS

Languages
Go (primary), Python, TypeScript
Architecture
Microservices, DDD, CQRS, Event Sourcing, Hexagonal, Vertical Slice
Backend
REST API, GraphQL, gRPC, WebSockets
Messaging
RabbitMQ, event-driven systems, async workflows
Data
PostgreSQL, MySQL, Redis, database modeling
Cloud & DevOps
GCP (Cloud Run), AWS, Docker, Kubernetes, Helm, Argo CD
CI/CD
GitHub Actions, automated testing pipelines
Practices
Code review, technical leadership, API design, observability, testing

EXPERIENCE

Backend Developer / Tech Lead Mar 2025 – Present
Dribba · Barcelona (Hybrid)

- Lead a team of 3 backend engineers: code reviews, architecture decisions, sprint planning, and technical mentorship
- Own the entire backend service lifecycle for a multi-vertical consumer platform (delivery, transport, experiences)
- Architected service-to-service communication using gRPC and async messaging with RabbitMQ
- Automated business-hour scheduling logic, eliminating daily manual processes across multiple modules

Tech: Go, GraphQL, gRPC, RabbitMQ, Redis, MySQL, GCP

Co-Founder / CTO Sep 2025 – Present
NeuroSuite · Remote (Part-time)

- Designed backend architecture for a neurology evaluation platform prioritizing auditability and HIPAA-style compliance patterns
- Built event-driven data flows for clinical evaluations, structured reporting, and export features
- Led a 3-person technical team: architecture, delivery planning, and code quality standards

Tech: Go, PostgreSQL, Python (AI services), React/Vite

Fractional CTO Mar 2025 – Jun 2025
Serenity · Remote

- Led system design and MVP implementation for an AI-enabled product
- Translated stakeholder requirements into technical milestones and delivered on schedule

Tech: Next.js, PostgreSQL, NestJS, Railway

Backend Developer (AI Focus) Feb 2023 – Mar 2025
MIA · Remote

- Built and scaled SaaS backend: database modeling, query optimization, and performance tuning
- Implemented LLM-powered features using RAG pipelines for data extraction and structuring
- Established CI/CD with GitHub Actions and containerized deployments on GCP Cloud Run

Tech: Python, FastAPI, MySQL, GitHub Actions, GCP

EDUCATION

Master's in Software Development & Architecture
La Salle Barcelona · 2024 – 2025

Bachelor's in Smart & Sustainable City Management
Autonomous University of Barcelona · 2020 – 2024
